

MovieLOD – Mô tả ontology cuối 3.0.0

Phiên bản: Ontology, dữ liệu, web và truy vấn dùng chung 3.0.0. MP4 đã được xóa theo yêu cầu; tài liệu demo dùng cho trình diễn trực tiếp.

Lớp và căn cứ

Lớp	Hành động	Lớp cha	Căn cứ / ý nghĩa
dbo:Work	REUSE	—	DBpedia supertype of supported entities; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Film	REUSE	dbo:Work	P31; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Agent	REUSE	—	DBpedia supertype of supported entities; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Person	REUSE	dbo:Agent	P31=Q5; P57/P161/P58/P162; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Artist	REUSE	dbo:Person	DBpedia supertype of supported entities; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Actor	REUSE	dbo:Artist	P161; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Writer	REUSE	dbo:Person	P58 via ScreenWriter; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:MovieDirector	REUSE	dbo:Person	P57; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:ScreenWriter	REUSE	dbo:Writer	P58; Reuse DBpedia meaning and its supported superclass; no local clone.

Lớp	Hành động	Lớp cha	Căn cứ / ý nghĩa
dbo:Producer	REUSE	dbo:Person	P162; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Organisation	REUSE	dbo:Agent	DBpedia supertype of supported entities; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Company	REUSE	dbo:Organisation	P272; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Genre	REUSE	—	P136; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:MovieGenre	REUSE	dbo:Genre	P136 in film context; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Award	REUSE	—	P166; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Country	REUSE	—	P495; Reuse DBpedia meaning and its supported superclass; no local clone.
dbo:Language	REUSE	—	P364; Reuse DBpedia meaning and its supported superclass; no local clone.
ex:Contribution	CREATE	—	P57/P161/P58/P162; A local credit association with one person, film and role; not the person or film itself.
ex:ContributionRole	CREATE	—	The four crawled credit predicates; Local controlled role values, not subclasses of Person.
ex:SourceSnapshot	CREATE	—	snapshots.json URL/ time/hash; A retrieved response record, not a domain entity.
void:Dataset	REUSE	—	Published collection of crawled film records; Reuse VoID dataset, remove ex:Dataset clone.

Lớp	Hành động	Lớp cha	Căn cứ / ý nghĩa
ex:ActionGenre	EXTEND	dbo:MovieGenre	P136 target English label; Local normalized film-genre bucket selected by matching the crawled English label; no DBpedia class of this narrow meaning in reference module.
ex:DramaGenre	EXTEND	dbo:MovieGenre	P136 target English label; Local normalized film-genre bucket selected by matching the crawled English label; no DBpedia class of this narrow meaning in reference module.
ex:ActingContribution	EXTEND	ex:Contribution	Credit claim corresponding to Actor; Local credit record classified by a fixed role; DBpedia Actor describes a person, not this record.
ex:DirectingContribution	EXTEND	ex:Contribution	Credit claim corresponding to Director; Local credit record classified by a fixed role; DBpedia Actor describes a person, not this record.
ex:WritingContribution	EXTEND	ex:Contribution	Credit claim corresponding to Writer; Local credit record classified by a fixed role; DBpedia Actor describes a person, not this record.
ex:ProducingContribution	EXTEND	ex:Contribution	Credit claim corresponding to Producer; Local credit record classified by a fixed role; DBpedia Actor describes a person, not this record.
ex:Filmmaker	EXTEND	dbo:Person	P57/P161/P58/P162; P166 when award-based; Local dataset-specific OWL-defined subset; not a replacement for a DBpedia base class.
ex:ActionFilm	EXTEND	dbo:Film	P136/P166; Local dataset-specific OWL-defined subset; not a replacement for a DBpedia base class.

Lớp	Hành động	Lớp cha	Căn cứ / ý nghĩa
ex:AwardWinningFilm	EXTEND	dbo:Film	P136/P166; Local dataset-specific OWL-defined subset; not a replacement for a DBpedia base class.
ex:MultiCreditContributor	EXTEND	dbo:Person	P57/P161/P58/P162; P166 when award-based; At least two semantically distinct credit records. Different roles prove their distinctness; the name is shorthand and does not exclude repeated same-role credits.
ex:ThreeCreditContributor	EXTEND	dbo:Person	P57/P161/P58/P162; P166 when award-based; At least three distinct credit records; three different role fillers prove distinctness. Not exactly three roles or an exhaustive career description.
ex:WriterDirector	EXTEND	dbo:Person	P57/P161/P58/P162; P166 when award-based; A person with both directing and writing credits in this dataset; classification is never manually asserted.
ex:ActorFilmmaker	EXTEND	dbo:Person	P57/P161/P58/P162; P166 when award-based; Local dataset-specific OWL-defined subset; not a replacement for a DBpedia base class.
ex:AwardWinningFilmmaker	EXTEND	dbo:Person	P57/P161/P58/P162; P166 when award-based; Local dataset-specific OWL-defined subset; not a replacement for a DBpedia base class.
ex:AwardWinningActionFilm	EXTEND	dbo:Film	P136/P166; Local dataset-specific OWL-defined subset; not a replacement for a DBpedia base class.

Lớp	Hành động	Lớp cha	Căn cứ / ý nghĩa
ex:GenreCrossingFilm	EXTEND	dbo:Film	P136/P166; Film carrying both action and drama genre memberships; this is not an unproved two-distinct-genre cardinality claim.

Quan hệ và datatype

Property	Kiểu	Domain	Range	Inverse / subproperty	Căn cứ
dbo:director	Object	dbo:Film	dbo:Person	– / –	P57
dbo:starring	Object	dbo:Work	dbo:Actor	– / –	P161
dbo:writer	Object	dbo:Work	dbo:Person	– / –	P58
dbo:producer	Object	dbo:Work	dbo:Agent	– / –	P162
dbo:productionCompany	Object	dbo:Work	dbo:Company	– / –	P272
dbo:award	Object	–	dbo:Award	– / –	P166
dbo:genre	Object	–	dbo:Genre	– / –	P136
dbo:country	Object	–	dbo:Country	– / –	P495
dbo:language	Object	–	dbo:Language	– / –	P364
ex:hasContribution	Object	dbo:Person	ex:Contribution	ex:contributionBy / –	Derived credit association
ex:contributionBy	Object	ex:Contribution	dbo:Person	– / –	P57/P161/ P58/P162
ex:contributionTo	Object	ex:Contribution	dbo:Film	ex:contributionOf / –	Containing source film
ex:contributionOf	Object	dbo:Film	ex:Contribution	– / –	Inverse of contributionTo
ex:hasRole	Object	ex:Contribution	ex:ContributionRole	– / –	Credit predicate to controlled role
ex:contributedTo	Object	dbo:Person	dbo:Film	– / –	OWL property chain
ex:directed	Object	dbo:Person	dbo:Film	dbo:director / ex:contributedTo	Inverse P57
ex:actedIn	Object	dbo:Actor	dbo:Film	dbo:starring / ex:contributionTo	Inverse P161
ex:productionOf	Object	dbo:Company	dbo:Work	dbo:productionCompany / –	Inverse P272
ex:sourceSnapshot	Object	–	ex:SourceSnapshot	– / –	Crawled entity response provenance
dbo:runtime	Data	dbo:Work	xsd:double	– / –	P2047; normalize to seconds

Property	Kiểu	Domain	Range	Inverse / subproperty	Căn cứ
ex:releaseYear	Data	dbo:Film	xsd:integer	– / –	Earliest Gregorian P577 year, precision ≥ 9
ex:sourceUrl	Data	ex:Source Snapshot	xsd:anyURI	– / –	Snapshot manifest sourceUrl
ex:retrievedAt	Data	ex:Source Snapshot	xsd:dateTime	– / –	Snapshot manifest retrievedAt
ex:sha256	Data	ex:Source Snapshot	xsd:string	– / –	Snapshot manifest sha256

Ngữ nghĩa và kết quả

Reuse 17 lớp DBpedia và một lớp VoID; 19 lớp riêng mở rộng theo facts. Actor dùng range của starring. Contribution có ba endpoint functional/exactly 1. Chain hasContribution rồi contributionTo tạo contributedTo; cardinality đặt trên hasContribution.

Không có FeatureFilm/DocumentaryFilm/FictionGenre hoặc fallback FilmAward thiếu căn cứ. ActionGenre/DramaGenre là bucket nhãn. GenreCrossing không chứng minh hai genre filler khác nhau. Hermit: consistent; 17 người min 2 credit, 7 người min 3, 10 WriterDirector.

Định nghĩa Manchester/OWL và từng ví dụ thật nằm trong DBpedia_OWL_Design.md/html. Hướng dẫn học nền và thực hành nằm trong Hương_dan_doc_hieu_project.pdf.
